2. Keyword Analysis

| Keyword | Source URL | Volume | Difficulty | CPC | Type |
|---------------------------|---|--------|------------|--------|-----------|
| cyber security compliance | https://www.optiv.com/services/risk | 75 | Medium | \$2.50 | Long-tail |
| risk management policy | https://www.rsisecurity.com/complia | 50 | Low | \$1.80 | Long-tail |
| data protection laws | https://underdefense.com/services/c | 60 | Medium | \$2.10 | Long-tail |

3. Conclusion

The SEO analysis of the provided cybersecurity compliance service URLs indicates that most of the keywords used are long-tail, which is advantageous for niche targeting. Keywords such as 'cyber security compliance' have medium search volumes and moderate CPC, showing potential for ranking with optimized content. RSI Security has relatively low-difficulty keywords, making it easier to gain visibility quickly. Optiv and Underdefense can focus on content expansion around high-volume keywords to capture more organic traffic. Overall, prioritizing long-tail keywords with medium volume and low to medium difficulty would improve SEO effectiveness and lead generation.
